

Rana Pratap Singh

FRONTEND DEVELOPER • REACT / TYPESCRIPT

Lucknow, India • 9999233082 • raghuvanshiranapratapsingh@gmail.com

[Portfolio](#) • [LinkedIn](#) • [GitHub](#)

Frontend developer specializing in React and TypeScript, with four self-directed projects — three live in production — and two national hackathon results: Top 30 nationwide at Sustainovation 2025 and Final Round finisher (out of 400+ teams) at HackOrbit 2025. Comfortable owning a UI end-to-end — from component architecture to deployment — and looking for a frontend internship to build performant, accessible user interfaces on a real product team.

SKILLS

Languages	HTML5, CSS3, JavaScript (ES6+), TypeScript
Frameworks / Libraries	React, Context API, Tailwind CSS, Bootstrap, Framer Motion
Tools & Practices	Git, GitHub, Vite, Vercel, Netlify, REST API Integration, Responsive & Accessible UI, Figma-to-Code

PROJECTS

Smart Metering App — *React, TypeScript, Tailwind CSS*

[Code →](#) [Live Demo →](#)

- **National Finalist — Top 30 nationwide at Sustainovation Hackathon 2025**
- Designed a smart home energy platform giving users real-time, appliance-level consumption insights to help reduce electricity usage
- Built a type-safe remote appliance control interface with React and TypeScript, fully responsive across devices, cutting down runtime bugs and easing maintenance

Echo Earth — *React, ElevenLabs Voice API, Framer Motion*

[Code →](#) [Live Demo →](#)

- Built for the Bolt Hackathon: a full-stack React app that turns real-time global environmental data into AI-narrated stories to drive public engagement with conservation issues
- Integrated the ElevenLabs Voice API for dynamic AI narration and Framer Motion for smooth UI transitions, from first commit to a live, deployed demo

AI-Based Wind Energy Prediction Dashboard — *React, TypeScript, Tailwind CSS, Recharts*

[Code →](#)

- Rapid-prototyped a frontend analytics dashboard for a B.Tech minor project predicting turbine power output (kW) from wind speed, direction, and time, using AI-assisted development (Claude, ChatGPT, Antigravity) to turn the concept into a working UI
- Built interactive charts and a prediction interface with Recharts, structured with a clear API integration point ready to connect to the team's XGBoost model on the backend (in progress)

Elementum Landing Page — *React, Vite, Tailwind CSS*

[Code →](#) [Live Demo →](#)

- Rebuilt a Figma agency landing page as a fully responsive, component-based React app, scaling cleanly from 320px mobile up to desktop
- Built a reusable letter-by-letter hover animation component and custom micro-interactions across the site, structured into 8 maintainable components

EDUCATION

B.Tech — Computer Science with Specialisation in Artificial Intelligence

Expected 2028

Babu Banarasi Das University

Intermediate (PCM), 2024 — 92.2% | High School — 90.83%

St. Anthony Public School

ACHIEVEMENTS & CERTIFICATIONS

- **HackOrbit 2025** — Reached the Final Round out of 400+ teams at this national-level 36-hour hackathon (MITS Gwalior)
- **NSS Volunteer (Management)** — coordinated large-scale campus events, managed cross-functional teams and on-ground logistics
- Building & Deploying Apps with Google AI Studio — GUVI × HCL, Google for Education Partner
